Summary

Mobile Developer with 1+ year of professional experience developing Android, iOS, and Web applications using React Native, Expo, React.js, ASP.NET Core, and .NET technologies. Experienced in building scalable REST APIs, implementing CI/CD pipelines, Docker-based deployments, and publishing production mobile applications through Google Play Store and Apple App Store. Passionate about writing clean, maintainable code and delivering high-quality software solutions.

Experience

Mobile Developer
Sajilo Life Pvt. Ltd.

March 2025 – Present

- Developed cross-platform mobile applications using React Native and Expo.
- Implemented Google Maps integration for real-time rider tracking and route rendering using Google Polylines.
- Built and maintained delivery and e-commerce mobile applications with reusable and scalable architecture.
- Managed Android application releases using EAS Build, Expo OTA Updates and Google Play Console.
- Built and released iOS applications using Xcode, TestFlight and Apple App Store Connect.
- Implemented GitLab CI/CD pipelines integrated with Expo Application Services (EAS) for automated Android builds.
- Developed React.js web applications and containerized deployments using Docker across multiple environments.
- Collaborated with cross-functional teams while following Git workflows using GitHub and GitLab.

Technical Skills

Languages

JavaScript, TypeScript, C, C++ , C#

Frontend

React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Mobile

Expo , React Native , EAS , Xcode , Nativewind

Backend

ASP.NET Core, REST API, Entity Framework Core

Database

MySQL, SQL Server

Tools

Docker, Git, CI/CD , Figma

Projects

Ticketaka – Event & Venue Booking Platform

A full-stack event and venue booking platform built using **ASP.NET Core Web API**, **Entity Framework Core**, and **MySQL**. Implemented JWT-based authentication and role-based authorization for secure access. Developed the mobile application using **React Native** with Google Sign-In and SMTP email verification. Containerized the backend using Docker and deployed it on Render. Configured EAS Build for Android releases and Expo Updates for over-the-air (OTA) updates.

FoodHub – Food Ordering Portal

A single-vendor food ordering application developed using **ASP.NET MVC**, **Entity Framework Core**, and **SQL Server**. Implemented separate customer and administrator roles with authentication, complete CRUD functionality for hotels and food items, and an administrative dashboard for managing users, hotels, and menu items.

Education

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)

Tribhuvan University, Institute of Science and Technology (IOST)

November 2022 – Present
